

Science – Weather and Space - Unit B Chapter 1 Study Guide

Vocabulary – you may see these questions at true/false, matching, fill-in the blank.

Atmosphere

Air pressure

Troposphere

Stratosphere

Weather

Humidity

Precipitation

Evaporation

Condensation

Water Cycle

Transpiration

Describe the composition of the Earth's atmosphere.

Explain what is meant by air pressure.

Compare and contrast the layers of the atmosphere.

Describe the processes of the water cycle.

Describe how atmospheric conditions are measured.

Explain how clouds form.

Demonstrate how fresh water can be extracted from salt water.

Describe the composition of ocean water.

Describe the importance of the water cycle.

Recognize that water is a limited resource that needs to be protected.
